Collections / From the Conquest to the founding of Canada / alcoholic beverage glass

CC BY-NC-ND 4.0 license

The glass is complete. It includes a bowl, a stem and a foot. The bowl has a slightly flared rim and a flared wall towards the top; its base is almost flat and its bottom thick. The stem is solid and cylindrical, with an almost central knob, and is flared towards the foot. The foot is circular, with a truncated cone profile at the top. Its rim appears to be folded in on itself. The underside has a slight off-center circular indentation and a trace of pontil on the central glass ; The decoration is cut and blown. It is plant-like. The wall is decorated with two long horizontal leafy stems. There is a small air bubble stretched out in the upper half of the stem and a small oval button on the stem.

Accession Number 2018.10.453

Date 1820 c

Materials British lead-colorless glass

Measurements 9,9 x 5,855 cm
