Collections / From the Conquest to the founding of Canada / alcoholic beverage glass

CC BY-NC-ND 4.0 license

The glass is complete; there is a small chip on the rim of the bowl. It is in three parts: the bowl, the stem and the foot. The bowl is bell-shaped, with a slightly narrowed wall and thick bottom, and a flared rim with a plain top. The stem is cylindrical and straight. The foot is circular. It has a conical profile and a straight edge. The center of the underside of the foot shows a trace left by the glass pontil, a tool used by the glassmaker to make glass ; The stem is adorned with a central stem in opaque white glass and two thin stems in opaque glass drawn and twisted around the periphery (Opaque twist).

Accession Number 2018.10.935

Date 1780 c

Materials colorless lead glass

Measurements 16,1 x 6,369 cm
