The bottle is complete, except for a small chip at the top of the neck. It is cylindrical in shape, with an angular shoulder; the neck is conical, short and straight. The neck has a swollen lip with a flat, narrow top. The base is beveled. The bottom is slightly domed, with an off-center incised ring. The body is gray in color, covered on the inside with a brown ferrous coating, which has rebounded on the outer lip, and on the outside with a salt glaze, giving it a shiny appearance. There are slight faults in the paste on the outer wall; none, apart from the colorless salt glaze that gives the surface a shiny appearance.

Accession Number 2018.10.283

Date 1890 c

Materials ceramics, English coarse stoneware, salt glaze

Measurements 15,3 x 3,46916 cm
