The bottle is complete. It is cylindrical in shape. In cross-section, it has a slightly domed wall, an angular shoulder and a high neck with an angular bearing at mid-height, ending in a neck with a domed lip and domed top. The wall is tapered towards the base, which is flared with a beveled contour; the bottom is slightly domed. Turning rings are visible on the outer wall. The surface is dark brown ; none, except for the bearing neck and the small groove above the bearing.
