Collections / From federalism to the end of the Second World War / bowl

CC BY-NC-ND 4.0 license

The bowl is complete. The bowl is circular in shape. In profile, it has a wall that flares out at the top, topped by a straight rim with a domed top. The wall curves slightly towards the straight base. The bowl rests on a foot in line with the wall, which has lost its silver coating. The bottom is recessed and flat. The silver coating on the inner wall has partially disappeared or

worn away. There are small linear marks on the inner base; the decoration is molded and coated. The bowl is covered on the outside with a silver lustre. Moulded decoration is visible on the outer wall. The outer wall is decorated with a group of three superimposed horizontal annular bulges under the rim. The rest of the wall is decorated with molded decoration in the form of a zone of domed vertical ribs, set between two domed horizontal rings.

Accession Number 2018.10.340

Date 1891 c

Materials ceramics, fine earthenware, glaze

Measurements 7 x 14,579 cm
