Oval-shaped box in spruce wood. The wall thickness is 1.5mm. The wall is made of a thin sheet of wood folded on itself. The two ends of the sheet overlap and are sewn together with a vertical row of thin spruce roots and a second L-shaped row. The lid, wall and base are assembled with small square wooden dowels (eight for the lid and eight for the base). The lid fits perfectly into the body of the box. The base is made from two pieces of wood that are assembled with wooden dowels. Planer grooves visible.

Accession Number 2021.59.136.1-2

Period 19th century?, 3rd quarter of the 20th century?

Materials wood, spruce

Measurements 13 x 24,5 cm
