Collections / Post-war to present day / coffee maker

CC BY-NC-ND 4.0 license

The coffee maker is complete. It is cylindrical in shape. In cross-section, the neck is high and straight, topped by a straight rim with a small spout. The wall is rounded and curves towards the flat bottom. It has a sloping, tubular side handle, which is hollow and terminates in a domed, circular knob with a circular hole in the center. The coffeepot rests on three small triangular

feet, rectangular in shape and made from a boudin folded in on itself. There is a mark painted in blue under the bottom: CNE ; Aucun.
