The inkwell is complete, lacking only a small chip under the rim. It is circular in shape. In cross-section, it has a flat, wide top, a straight wall that tapers near its base and a flat, unglazed underside. The body is pinkish-beige with quartz inclusions. The glaze is white and glossy; the decoration is hand-painted in polychrome yellow and violet underglaze. It is geometric. The decoration is applied to the top of the cup. Radiant lines are painted in violet on a yellow background.
