The bottle is complete. It is square in shape. In cross-section, the walls are straight and plateau-like over almost their entire surface. The shoulder is dropped, the neck is conical and topped by a neck made of a swollen lip with a flat, wide top. The base is beveled and the bottom has a wide fulcrum, the center of the bottom is sunken into a dome and features an indecipherable diamond-shaped molded mark, of the registration mark type. There is a vertical mold line on two of the opposite corners; this line crosses the shoulder and part of the neck, and runs to the base ; None, other than the shape of the container with its raised walls.

Accession Number 2018.10.412

Date 1883

Materials green-tinted glass

Measurements 18,1 x 6,3 x 6,3 cm
