The plate is complete; there are a few chips on the rim. The plate is circular, with a plain rim. In cross-section, the rim is in line with the marli, which slopes towards the bottom; the wall is low and curved towards the bottom, which is flat. The reverse of the plate is almost truncated cone-shaped, with a flat bottom and a beveled edge. The body is pinkish-beige in color and

covered with a white glaze. Three traces of linear and triangular beads are visible under the marli. There are flaws in the enamel on the face and reverse. The decoration is hand-painted in blue underglaze. It is geometric. The decoration is painted on the marli. It consists of a fillet near the edge, bordering a row of thick, slightly curved lines whose ends overlap.
