Collections / From the Conquest to the founding of Canada / plate

CC BY-NC-ND 4.0 license

The plate is complete; there are a few chips on the rim. The plate is circular, with a plain rim. In cross-section, the rim is in line with the marli, which slopes towards the bottom; the wall is low and curved towards the bottom, which is flat. The reverse of the plate is almost truncated cone-shaped, with a concave bottom and an angular base. The body is pinkish-beige and covered with a bluish-white glaze. Three traces of linear, triangular beads are visible under the marli. There are flaws in the enamel on the face and reverse. There are small linear marks and wear marks on the inner base, and wear marks under the base. The enamel around the rim of the plate has largely disappeared ; The decoration is hand-painted in blue underglaze. It is geometric and floral. The decoration on the border consists of a fillet near the edge, which is decorated with a wavy line and two rows of pearls on either side of this line. In the center of the background is a star-shaped

flower atop a leafy stem.

Accession Number 2018.10.942

Date 1760 c

Materials ceramic, white earthenware

Measurements 2,9 x 22,2148 cm
