The plate is complete. The plate is circular in shape, with a plain rim. In cross-section, the rim is in line with the marli, which is high and has an almost flat landing, before joining the wall, which is low and curved towards the bottom, which is flat. The reverse side of the plate is almost truncated cone-shaped, with a flat bottom and an angular periphery. There

is a gap between the wall and the rim. The body is pinkish-beige in color and covered with a white glaze. Three linear, triangular bead marks are visible under the marli. There are small linear marks on the inner base. The decoration is hand-painted in blue underglaze. It is geometric. The decoration on the border consists of a band. In the center of the background is a spiral medallion.

Accession Number 2018.10.949

Date 1760 c

Materials ceramic, white earthenware

Measurements 2,5 x 19,8129 cm
