The bottle is complete. It is cylindrical in shape. In cross-section, the bottle has a straight wall, a rounded shoulder and a long, bulging neck topped by a neck made of a small, swollen ring and a high, flat-topped conical ring. The base is straight and the bottom is domed. There is a horizontal mold line below the shoulder, from which two vertical mold lines run up through the shoulder and neck to the neck ; None, except for the shape of the container.

Accession Number 2018.10.411

Date 1890 c

Materials turquoise-tinted glass

Measurements 17,2 x 3,4 cm
