The plate is complete; there are a few chips on the rim and a few cracks. The plate is circular, with a plain rim. In cross-section, the rim is in line with the marli, which is high and slopes towards the bottom, which is flat. The reverse side of the plate is truncated cone-shaped with a flat bottom and a rounded base. The body is pinkish-beige in color and covered with a

white glaze. Three traces of linear, triangular pernettes are visible under the marli. There are flaws in the enamel on the face and reverse. The decoration is hand-painted in blue underglaze. It is geometric and floral. The decoration on the marli consists of a superimposed band and fillet. In the center of the background is a medallion made of a double ring, surrounding a leafy stem.

Accession Number 2018.10.945

Date 1800 c

Materials ceramic, white earthenware

Measurements 3,9 x 22,7148 cm
