Collections / Post-war to present day / spoon

CC BY-NC-ND 4.0 license

The spoon is complete. It is thick and comprises an oval spoon, a straight stem with a square cross-section and rounded sides, and the junction of the handle with the stem is cut into an elongated point on the sides. There appears to be a mark in the form of an anchor; the decoration is molded and is located at the end of the handle and under the spoon. The end of the handle is straight and its junction with the stem is cut into a point.
